

GAURAV VISHWAKARMA

Java Developer · Spring Boot · React.js · AI/ML Enthusiast

+91 9889384863 | vishwakarmagaurav013@gmail.com | gauravsd.vercel.app | github.com/gauravsd-git | linkedin.com/in/gaurava-sd

PROFILE SUMMARY

Java Developer focused on backend engineering (Spring Boot, REST APIs) with working knowledge of React.js — built and deployed Vendora, a role-based retail management system. MCA graduate (CGPA 8.23), building toward Backend Engineering + AI.

TECHNICAL SKILLS

- Backend: Java, Spring Boot, Spring Security, JWT, REST APIs, JPA, Hibernate, MVC Architecture
- Frontend (working knowledge): React.js, Vite, Tailwind CSS, HTML5, CSS3, JavaScript
- Database: PostgreSQL, MySQL, H2 — query optimization, schema design, JPA integration
- Testing & QA: JUnit (unit testing), Postman (API testing), Swagger UI (API docs & validation)
- AI / ML (currently learning): Python, Scikit-learn, Neural Networks, Soft Computing — academic + certified
- Tools: Git, GitHub, Maven, Gradle, Figma, IntelliJ IDEA, VS Code, pgAdmin, Android Studio

PROJECTS

Vendora — Multi-Store Retail Management System

Jan 2026 – Mar 2026

Java · Spring Boot · React.js · Tailwind CSS · MySQL · JWT · JUnit · Postman

Live Demo: vendora-ui.vercel.app | GitHub: github.com/gauravsd-git/vendora

- Independently architected and built a full-stack multi-store retail management system with three distinct role-based dashboards (Admin, Store Admin, Cashier) across an 11-page React interface.
- Designed a layered Spring Boot backend (controller-service-repository-mapper) exposing 7 REST API modules — auth, users, stores, products, orders, payments, and analytics — secured with JWT and role-based authorization.
- Implemented protected routing and persistent JWT session handling with React Router DOM and Axios, including auto-redirect and role-specific navigation after login.
- Built dedicated cashier billing and order-creation workflows, store-level product/order/payment management, and admin analytics (total sales, top products).
- Styled a responsive dashboard with Tailwind CSS and Vite, tailored per role for Admin, Store Admin, and Cashier users.

Google Doc — Mini System Design Project

Jul 2026

Java · System Design · SOLID Principles · UML

Live Demo: github.com/gauravsd-git/Google-Doc---system-design-project

- Built a simplified Google Docs clone in Java, applying object-oriented design and UML-driven architecture to a real editing system.
- Modeled a document editor composing text, line breaks, tab spaces, and images into a single renderable, persistable document — designed around SOLID principles for extensibility.

Blogging Application

Sep 2025 – Oct 2025

Spring Boot · Spring Security · JWT · PostgreSQL · Swagger UI · MVC

Live Demo: github.com/gauravsd-git/Blogging-App-

- Built a full-featured blogging platform with user authentication, post creation, likes, and comments using MVC layered architecture.
- Secured all endpoints with Spring Security + JWT; documented and validated APIs using Swagger UI.
- Applied clean repository-service-controller separation with PostgreSQL integration for a maintainable backend.

EXPERIENCE

Software Development Intern — CodeClause

Aug – Sep 2023

Remote

Live Demo: github.com/gauravsd-git/CodeClauseInternship_MusicPlayer

- Independently designed and built a 3-screen Android music player — splash screen, song library with add/delete, and full playback controls (play, pause, next, previous) — the most complete of three assigned intern tasks, delivered in 2 weeks.
- Followed a Git branching workflow — feature branches, commits, and code review practices in a collaborative setup.
- Systematically tested and debugged functionality across the development cycle.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Veer Bahadur Singh Purvanchal University, Jaunpur, UP — Final CGPA: 8.23 · First Division with Honours

Key subjects: Software Engineering, Artificial Intelligence, DBMS, OOP, Computer Networks, Machine Learning, Soft Computing, DSA

Bachelor of Computer Applications (BCA)

2020 – 2023

Veer Bahadur Singh Purvanchal University, Jaunpur, UP — CGPA: 7.9

CERTIFICATIONS

- Java and OOP — Saylor University (Dec 2025)
- Java Concurrency & Multithreading — Scaler (Aug 2025)
- Spring Boot — Scaler (Oct 2025)
- Artificial Intelligence — HP LIFE (Oct 2025)
- Claude 101 — Anthropic Academy (Jul 2026)
